

Co-published by the [Institute for Parks, People, and Biodiversity, University of California, Berkeley](#) and the [George Wright Society](#).

Parks Stewardship Forum explores innovative thinking and offers enduring perspectives on critical issues of place-based heritage management and stewardship. Interdisciplinary in nature, the journal gathers insights from all fields related to parks, protected areas, cultural sites, and other place-based forms of conservation. The scope of the journal is international. It is dedicated to the legacy of [George Meléndez Wright](#), a graduate of UC Berkeley and pioneer in conservation of national parks.

Parks Stewardship Forum is published through [eScholarship](#), an open-access publishing platform subsidized by the University of California and managed by the California Digital Library. Open-access publishing serves the missions of the Institute for Parks, People, and Biodiversity and the George Wright Society to share, freely and broadly, research and knowledge produced by and for those who manage parks, protected areas, and cultural sites throughout the world.

The journal continues *The George Wright Forum*, published 1981–2018 by the George Wright Society.

CONTRIBUTING TO PARKS STEWARDSHIP FORUM

We welcome proposals for papers in PSF’s two main departments: “New Perspectives,” for non-peer-reviewed articles that will be evaluated solely by the journal’s editors; and “Advances in Research and Management,” for articles that will undergo formal peer review. We also welcome proposals for “The Photographer’s Frame: Photoessays in Conservation,” which tell a compelling story in photographs.

Berkeley Institute for Parks, People, and Biodiversity

The UC Berkeley Institute for Parks, People, and Biodiversity aims to bring an interdisciplinary approach to the research, management, and protection of our national, state and local parks and public lands. Recognizing that parks and public lands play an increasingly important role in climate adaptation, public health, education, jobs, and environmental justice, the Institute will serve as convener, research coordinator, and bridge between field managers and the academic community.

The Institute is devoted to the investigation, dissemination, and application of science to the critical issues facing national, state, and local parks, and equivalent protected areas. The Institute fosters cross-disciplinary research, applied science, policy, and field management, and also strives to help prepare the next generation of conservation leaders in academia and in the field.

The George Wright Society advances the scientific and heritage values of parks and protected areas. The Society promotes research and resource stewardship across cultural and natural disciplines; brings practitioners together to share their expertise; provides avenues of communication among scholars, researchers, educators, practitioners, and the public about the importance of parks and protected areas; and supports informed conservation decisions and management actions that embrace these values. By uniting people from many different backgrounds around a common passion for protecting Earth’s natural and cultural heritage, we create the collaboration needed to meet today’s greatest conservation challenges.
